

DISTRICT WEATHER & CIVIL WORKS BULLETIN

Ref: DCB/NMD/2026/0914 Page 1 of 1

Issued 13:30 IST by District Meteorological Centre, in consultation with the District Public Works Department.

1. Rainfall forecast, 15:00 to 21:00 today

The Narmada catchment is expected to receive 68 mm of rain in this window, with intensity peaking between 17:00 and 19:00. This is the second such window this week. The 24-hour total since Tuesday is already 94 mm.

2. Bridge and culvert status

The culvert at Halipur, chainage 12.4 km on the Narmada corridor, is rated for a design flow of 3.2 cumecs. Observed inflow yesterday was 2.9 cumecs and is trending upward. PWD has recorded surface cracking on the deck and standing water at the second pier in the inspection of 11 September. The structure has not been certified since 2022.

3. Standing advice

PWD advises that vehicles over 7 tonnes should not use the Halipur culvert crossing during or after rainfall until the deck has been re-inspected.

4. Route 7 condition

Route 7 (Halipur - Rewa Bypass - Kolar) is open to all vehicle classes. The surface is uneven for approximately 6 km and travel speed is restricted to 25 kmph. No fuel point exists between Halipur and Kolar on Route 7.
